

Journey to Wellness

The Dimensions of Wellness initiative is a collaborative journey to invite, enable, and release the capacity of every human being to grow their wellness. At the core of the partnership is the belief that everyone seeks well-being, and it is our responsibility to co-create the conditions, interactions, and resources such that they can realize this aspiration.

Most of us are aware of the importance of wellness practices and appreciate the importance of living a well-balanced life, yet few of us seem to maintain these wellness practices in our daily lives. Studies show that those who do are better friends, better students, better employees, and are more likely to thrive in their lives than those who do not actively pursue wellness.

The FZdhwSef platform provides a collaborative journey to invite, enable, and release the capacity of every human being to grow their wellness. At the core of the partnership is the belief that everyone seeks well-being, and it is our responsibility to co-create the conditions, interactions, and resources such that they can realize this aspiration.

Dimensions of Wellness

- Emotional
- Environmental
- Spiritual
- Financial
- Intellectual
- Occupational
- Physical
- Social

Through the FZdhwSef platform, players first connect with peer wellness stories to motivate and guide them in unlocking their own wellness goals. The platform then provides the necessary resources and enabling community such that all can achieve life wellness as they level up on each of the eight dimensions of wellness.

The FZdhwSef platform provides a collaborative journey to invite, enable, and release the capacity of every human being to grow their wellness. At the core of the partnership is the belief that everyone seeks well-being, and it is our responsibility to co-create the conditions, interactions, and resources such that they can realize this aspiration.

This opportunity is open to all, and can be a transformative enhancement to any existing program or individual life. Example implementations include:

- recovery programs interested in building up wellness capacity such that clients are less likely to pick up the first drink,
- campuses working to develop the whole student such that they are able to thrive in life, and
- companies concerned with the health and well-being of their employees as part of an employee wellness effort.

This project is a collaboration among the Center for Games and Impact, the School for the Future of Innovation in Society, and the School of Nursing and Innovation at Arizona State University. The eight dimensions of wellness were developed and researched by the Substance Abuse and Mental Health Services Administration (Samhsa.org), and adapted to the platform in collaboration with Gloop and the Center for Dependency, Addiction and Rehabilitation.
